## GOD IS VISITING US AT LICC

God has blessed LICC with an interim president, Dr. Nuwoe-James Kiamu. Dr. Kiamu comes to LICC as President Emeritus of United Liberia Inland Church (ULIC) to provide Spiritual leadership and steer affairs of LICC pending the recruitment of a President. He comes highly recommended by the Board of Trustees of LICC and approved by ULICAF and ULIC. (Insert picture of Dr. Kiamu being introduced by Karney Dunah, ED of ULICAF to the students)

Exciting work is happening on the LICC campus. The first semester of 2016-2017 school year has come to a close. God has been visiting the grounds and many students and staff are keeping the appointment. Dr. Kiamu has created mentoring groups, seven to be precise. These groups are guided by two LICC staff and have been 15 – 17 students in each group. Some groups meet weekly, some meet twice a week but every group is meeting. It would be wonderful if you would be willing to pray along with LICC and here are the prayer points:

As God visits us at LICC we should thank Him for His salvation, position ourselves for His visitation and expect results of His visitation.

### On campus, we should:

1. Experience Spiritual renewal and Christ-centered living
2. Have total health and welfare
3. Make progress in facility maintenance and development
4. Have warm, joyful and caring school environment.

### As staff, we should:

1. Have wisdom to obey God and serve LICC
2. Have favor with God, government and LICC Family
3. Have understanding and cooperation among LICC administrators, faculty, staff and students
4. Have improved financial situation
5. Have physical, emotional and spiritual health

### As student body, God would:

1. Give wisdom, vision, strength and understanding to study well
2. Provide finances to fund education
3. Provide good health and welfare of students' families and dependents
4. Transformed students to be change agents for His kingdom

### LICC Projects:

1. Institutional self-study
2. Upgrading LICC to BA, BSc status
3. Building required faculty and staff capacity for expected status
4. Building vibrant LICC winning team

Work on the Agriculture Research Center is really starting to come together. We are still raising funds for the science lab. This lab will be unique to Liberia because it will not be a lab to only test soils but a lab to conduct small animal cultures and diagnosis. The lab needs more microscopes, sinks, a counter and the large window to be installed. Please continue to support the growth of the LICC science program.

The minister of Agriculture, Dr. Moses Zinnah made a visit to LICC recently. He spent over an hour with Dr. Kiamu and Agriculture team at LICC. He toured every part of the campus, the buildings, the computer lab and offices, the library and all over the farm. At the end of his visit, Dr. Zinnah said he was "thoroughly impressed" and would continue to work on using the LICC as a tool and partner to develop the economy in Liberia.

Thanks very much for praying and supporting ULICAF and her initiative, LICC in Liberia. We appreciate your generous gift.
